Windows 10

1. Open the Settings app.
2. Go to Network & Internet.
3. Tap on Wi-Fi.
4. Click on the network you want to connect to, and then click on "Set up a new connection or network." Select "Manually connect to a wireless network" and click "Next."
5. Enter the network name and security type. For security type, select "WPA2-Enterprise." Enter the encryption type as "AES." Click "Next."
Windows 10

6. Change connection settings
   Open the connection properties so that I can change the settings.

7. epfl Wireless Network Properties
   - Name: epfl
   - SSID: epfl
   - Network type: Access point
   - Network availability: All users
   - Connect automatically when the network is in range
   - Look for other wireless networks while connected to this network
   - Connect even if the network is not broadcasting its name (SSID)
   - Disable initial connection settings
